Around the Creek

Message from the SCRS Board Chair

By Pam Garbin

Happy Spring!!!! I love the sound of melting snow and birds singing. Bring on the heat and lets get ready for planting season. If you have any gardening questions please make sure that you search the Sapræe Creek Gardening 101 Facebook Page, lots of advice and fantastic sharing of photos for inspiration.

Thank you to everyone who attended one of the two tubing events this year. The weather was fanstastic, the food excellent and as always a great time with fellow Sapræe Creek friends and neighbours. I want to thank Vista Ridge and staff for having a fantastic facility right in our back yard, Sheila and Alex at Bertinis for the food and service and the Sapræe Creek Board members that plan and execute these awesome community events. A great team effort all around.

As we move into April I want to encourage new and old community members to sign up for one of the two upcoming Casino dates. April 28 and 29th are the dates and you can sign up using the signup genius found on our Facebook Page. If you do not have Facebook please contact Marilyn Rustad at 780-715-4960 and she can get you all the details. There are so many things that this money goes to in our community including upgrades and maintenance to our trails, recreational upgrades at the parks in our community, safety courses and so much more.

Please consider volunteering for a time slot for our Casino.

This month we would like to have a member of St. Johns Ambulance come out to Sapræe and teach First Aid to our teens ages 16-20. This is a free course and we are looking at having it on May 14 and 15th. All cost associated and lunch will be provided for this TWO day course. Looks great on a resume and you never know when it may come in handy. Please contact me by April 3rd if you or your teenager can attend this training session, 780-881-4974.

We will be looking into offering this same CPR course for adults, a bear training course and a babysitting course in the next couple months, watch Facebook for more information.

With May just around the corner, watch for Ladies Night and Home Based Business Open House, Spring Youth Sports, and Community Clean Up. Have a great April everyone.

Councillor's Corner - April 2016 by Al Vinni

I would like to devote my column this month to commentary concerning the Notice of Motion that I have placed on the Council Agenda for debate at our April 5th meeting, which starts at 6:00 pm at the Jubilee Centre.

My Notice of Motion reads as follows:

“THAT Regional Municipality of Wood Buffalo Council enter into discussions with the oilsands companies with a view to quickly formulating a plan that would both:

- (a) reduce the property tax burden on the oilsands companies; and
- (b) see oilsands companies expand the employment of residents of the RMWB with particular focus on the elimination or reduction of costly fly-in, fly-out operations that exist at many of the oilsands operations in this Municipality.

The obvious intent of this motion is for the oilsands companies to come to the table with Regional Council to discuss the issue of how Council can reduce oilsands companies' property taxes for those companies willing to step up to the plate and implement policies that would see more of the people working at their operations be resident in this region. It has always been astounding to me how many non-residents of the RMWB actually work here, and more importantly how companies can afford to fly-in and fly-out (“FIFO”) employees that live throughout Canada.

It is pretty obvious given the tremendous oilsands growth from about 1999 to 2012 that the resulting labour shortage almost required the FIFO situation to develop. However, recent events signal that FIFO be scaled back with an ultimate goal being the end of FIFO in this region. The most important event is the maturation of the oilsands industry, which sees more of the industry in the operational phase as opposed to the capital build phase. You need local people to run a plant operationally, it is just not efficient or cost-effective to run a plant operationally for 40 years with FIFO employees. Simply cannot be done.

Second event is more immediately obvious, and that is the economic downturn caused by low oil prices. It reveals the costs borne by the local communities when tens of thousands of people living in other provinces in Canada work in this region, while local people go without jobs. Jobs they cannot obtain even when they volunteer to drive out to site in their car or on a bus and stay for the duration of their shift. When these people are told, no, that you must FIFO to work at this plant even in the face of the offer above, well that is incredibly frustrating for those of us that have chosen to make Fort McMurray and the RMWB our home.

Councillor's Corner - April 2016 by Al Vinni

It makes it very difficult to build community when the reality of our region is high unemployment and lower housing prices caused by corporate decisions to utilize a FIFO system that was created to serve a different reality. I am deeply saddened by the way in which the oilsands companies have forsaken this region. Fort McMurray was built to assist the oilsands industry in becoming a successful and sustainable industry; we need to remain a partner in that reality.

Thanks to all that have entered into this public dialogue about the issue of getting more of our people employed, and getting more people to come to live in Fort McMurray. A lot of you have been wondering where the money for lower taxes will come from if we get industry buy-in on supporting employment for this region and beginning the scale back of FIFO. First, the RMWB always holds two reserve funds of \$50 million dollars each. (Always seemed like a lot of reserves to me.) This \$100 million could be drawn down to finance a tax rebate program for companies who provide demonstrable proof that they are hiring locally and/or are reducing their FIFO program. Allowing the reserves to remain at a lower level means that goal of stimulating employment in this region is accomplished in the short run with no necessary tax increases to anyone.

Longer term, with an ongoing reduction in capital spending by the RMWB, restricting capital projects to only those that are needed, versus those that are more wants, or nice to have, would mean we could continue to support funding for FIFO reduction programs, again with no increase in property taxes for anyone. As I said above, the RMWB, like industry, is becoming more about operational spending, not capital spending. A lot of our infrastructure needs have been supplied, and given the economic stagnation of our region, the need for major capital projects going forward will diminish. Further, as more local people are employed, as we make it attractive for people to move here, economic activity will return to levels that support the businesses and people that have committed to this place we call home.

This can be a win-win; we simply need industry to meet us half way: lower taxes in exchange for policies that benefit the economic vitality of this region, and hence ultimately lead to a prosperous and vital place to live, work and play. I look for continued engagement by all on this issue, the stakes are high, and we need to see positive initiatives undertaken.

Thx, Allan Vinni

Councillor, Ward 3

Open House Notice

Construction - Sapræ Creek Lift Station

Residents of Sapræ Creek,

As part of the Municipality's ongoing development of the Rural Water & Sewer Servicing program in Sapræ Creek, a new lift station is planned for your community. A lift station is an integral part of the new sanitary system planned for Sapræ Creek. It contains pumps and conduits which monitor and guide the flow of sewage from your homes to wastewater treatment facilities in the region.

Residents will have the chance to discuss the plans for this new lift station at an open house on April 13, held at Vista Ridge from 6 p.m. to 8 p.m..

Attendees will be able to speak with Municipal staff from the Rural Community Development and Engineering departments, asking questions about the scope of the project and the benefit it will bring to Sapræ Creek.

For more information on this open house, please call Janine Kruse at **780-588-3735**. If you have questions about this construction project or others, please contact the Construction Hotline at **780-793-1054** or constructionhelpdesk@rmwb.ca.

Rural Water & Sewer Servicing (RWSS) – March Update

The RWSS project aims to strengthen regional service delivery quality for the residents of Wood Buffalo. The project will see residents of Anzac, Conklin, Gregoire Lake Estates, Janvier Sapræe Creek and Draper receiving either new or upgraded water and sewer service. This update will help you stay informed about RWSS preparation in your community.

Gregoire Lake Estates

Beginning in late April or early May (based on weather conditions), ATCO Electric, ATCO Gas and Telus will be relocating utilities in the community of Gregoire Lake Estates. The expected timeline to completion is one month, barring any unforeseen complications. This work is required to clear a path for installation of sanitary and water mains by municipal contractors.

This work will involve realigning the currently existing power lines and replacing the utility poles with taller poles. As well as shifting the power lines, new gas mains will be installed on both sides of the road and temporary communication lines will be installed by Telus.

Following completion of franchise utility relocations, municipal contractors will move into the area and begin removing the road surface to install sanitary and water mains. A new ditch and culvert system will be put in place, as well. This work is expected to start in May or June 2016 (based on weather conditions). As the project is completed, residents will see their new main lines installed, but service connections will not be made at this time. Completion of the main lines and road rehabilitation is expected by the end of the 2017 construction season.

Anzac

Designs for the Anzac system have advanced farther than previously expected, allowing for an earlier start date and reducing the disruption to residents' lives caused by intense periods of construction. Work will begin on the Highway 881 and Stony Mountain lift stations in August 2016. These two installations are the first of seven new sanitary lift stations in Anzac.

Sapræe Creek

In May 2016, contractors will begin laying new sanitary mains and larger diameter water mains on Freestone Way and Sapræe Crescent. Contractors will also complete a final lift of the asphalt on Freestone Way and Sapræe Crescent. Completion of the initial section is expected by the end of the 2016 construction season, with final landscape cleanup in spring of 2017.

Following this initial round of construction, new sanitary mains and water mains will be constructed within the balance of Sapræe Creek Estates. The higher capacity water mains will provide full fire protection to the area.

REGIONAL MUNICIPALITY
OF **WOOD BUFFALO**

Conklin

Tree clearing has been completed in preparation for new sanitary lines along Northland Drive, which will service the new Conklin Multiplex, as well as the Conklin Community School and the commercial properties on Northland Drive. Starting in May 2016, contractors will be laying new water and sanitary lines on Conklin Drive, Poplar Crescent, Spruce Drive, Poplar Drive and Pine Lane. This work will be completed as fast as possible in the 2016 construction season and all remaining work will be completed in the 2017 construction season. Before shutting down for the winter, all affected roads will be returned to a safe and drivable condition at the end of the 2016 construction season.

Two out of five new lift stations for Conklin will also be started, with full completion of all five stations expected by the end of the 2017 construction season.

Janvier

Work in Janvier will begin in the Summer of 2016 and will continue into 2017. A new lagoon is proposed in Janvier near the Solid Waste Transfer Station. Construction is pending approvals from regulatory authorities but is tentatively scheduled for January 2017. The lagoon will be in service by the end of 2017.

Draper

At this time, no construction is planned for 2016, but negotiation is ongoing to secure land for a new lift station to service this community and pave the way for future RWSS development.

9-1-1

National Telecommunicators Week – April 10 - 16

Regional Emergency Services (RES) Public Safety Communications Branch provides emergency dispatch to the Regional Municipality of Wood Buffalo. When you dial 9-1-1 you are connected locally to the RES Telecommunicators who dispatch services for fire and medical related emergencies. If your emergency requires police, the Telecommunicators will immediately transfer you to the RCMP dispatch centre for further assistance. If you are experiencing or are a witness to an emergency, please remember the following:

- **Try to stay calm**
 - Telecommunicators will be able to help you quickly and more efficiently if you stay calm.
- **Listen carefully & answer questions**
 - Keep answers quick and concise so that the Telecommunicators can determine and dispatch the necessary emergency services.
 - Be prepared to tell the address of the emergency, the phone number you are calling from, and details about the emergency. Depending on the type and severity of the emergency, the Telecommunicator may continue to ask you a series of questions.
- **If you call 9-1-1 by accident – DO NOT HANG UP!**
 - Telecommunicators will follow up with all calls. If you accidentally call 9-1-1, stay on the line and explain that it was a mistake to avoid emergency services from being dispatched.
- **Is it an emergency?**
 - If the situation does not require police, fire or an ambulance, do not call 9-1-1.
 - ONLY CALL 9-1-1 in an emergency.
