Get your submission in before the survey closes on June 28.

Help protect your home from wildfire

Know your Zones:

The closer to your home, the more important it is to be free of things that burn.

● Immediate Zone: within 1.5 metres of your home, nothing that burns should be here.

Choose building materials that are resistant to fire, clean your gutters out regularly, clear any brush or trees, and avoid planting woody shrubs or trees (or prune them regularly to at least 2 metres above the ground if you can't).

● Intermediate zone: from 1.5-10 metres from your home, continue to avoid anything that burns.

Keep it free from lawn furniture, toys, firewood, or anything else that burns. This is how you can prevent fire from reaching your home.

● Extended zone: from 10-30 metres from your home, the goal is reduce fire intensity.

If you can, remove evergreen trees so there's at least 3 metres between them, prune all branches at least 2 metres above the ground, and keep it clear of brush. Work with neighbours to address these risks if their yards are within 30 metres of yours.

Walking Safety Tips

Walk Facing Traffic: If there is no sidewalk and you must walk on the side of the road, choose the side where you are facing oncoming traffic. This gives you the best chance to see traffic approaching closest to you and take evasive action if necessary.

Cross Safely: Look both ways before crossing any street. Make eye contact with any drivers who may be turning. Give them a wave. Make sure they see you.

Walk Single File: Unless you are on a sidewalk separate from the road, you should walk single file. This is especially important on a road with lots of curves. While it can be enjoyable to walk down the road two or three abreast chatting merrily, drivers don't expect it.

Stay aware of bikes and runners: Share the road and path with bikes and runners. Bike riders should alert you when approaching from behind with a bike bell or a "passing on the left/right." Listen for them.

Be Visible: Wear bright colors when walking in daytime. When walking at night wear light-colored clothing and reflective clothing or reflective vest to be visible.

Hang Up and Eyes Up: Chatting or texting while walking is as dangerous as doing that while driving. You are distracted and not as aware of your environment. You are less likely to recognize traffic danger, passing joggers and bikers or tripping hazards. Potential criminals can also see you as a distracted easy target.

When walking your pet: keep your pet on the side away from traffic so that they don't accidentally dart into the roadway.

BE BEAR AWARE

It's springtime, which means bears are now crawling out of hibernation dens in search of food. Many areas within the RMWB are in bear territory, so we need to be aware. Below are a few key safety points to keep in mind:

- Never feed wildlife.
- Dispose of waste in proper waste receptacles.
- Make noise so bears can hear you coming – talk, sing or give a shout out when approaching a blind corner.
- Don't wear headphones or anything that will interfere with your ability to detect nearby wildlife.
- Be aware of your surroundings (situational awareness).
- Watch for signs of bear activity such as tracks or scat.
- Consider carrying air horn or bear bells.
- Do not take pictures.
- Refrain from picking garbage in areas that have had recent bear sightings.
- Be extra aware during early morning and evening hours.
- Leash your dogs.

If you encounter a bear,

- Back away slowly and cautiously, but do not turn your back
- Stay calm
- Do not run
- Give the bear space
- Use an air horn, whistle or other bear deterrents
- Stay close to those you are with
- Talk calmly
- Wave arms slowly
- Avoid eye contact
- Leave the area

Situational awareness is not a skill; it's a mindset of being aware of your surroundings.

aware**
